

~~SECRET~~/NOFORN-SKEET CHANNELS ONLYPROJECT SUN STREAK (U)WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

## CRV Session Procedures Report (S/NF/SK)

Control Number	: 8704
Date of Session	: 31Mar87
Date of Report	: 01Apr87
Source Identifier	: 021

1. (S/NF/SK) Tasking: See original tasking data sheet, attached.  
No change in tasking.

2. (S/NF/SK) Session: After reviewing her last session, (19 March 87), source began the session with a movement from the center of the open area to a point "6 kilometers southwest". Source's conceptual sketch (see session, p.6) of the dimensionally complex structure at that location is noteworthy--no other source to date has produced a sketch. [Note: a review of previous sessions seems to indicate that, although the "first part" of this problem tasked each source with describing the "open" part of the site, most began with a description of the structure or "second part" of the tasking. (See especially Source #021 session on 19 March 87). Although source performed well during the session, she ran out of steam prematurely.

3. (S/NF/SK) Summary: Site is a manmade structure in an isolated area. Structure is tall, broad, narrow, flat on one side and curved or rounded on the other; very modern in appearance (AI-"BIG!"). Perception of air (airiness) moving through the structure. People seem to be absent; a sense of self-contained or remote-control/maintenance prevails. There is a whirring sound inside which seems to be associated with a perpendicular, smooth movement (AOL-"like a conveyor belt of some sort").

4. (S/NF/SK) Feedback: Source was informed that she was the first to be able to cope with the dimensionally complex architecture of the site and that the next session would be taken up with a systematic exploration of the inside of the structure, where the "intel question" resides.

And here

Site is a manmade structure in an isolated area. The structure is tall, broad, narrow, flat on one side and curved or rounded on the other.

There is a feeling of airiness, — air moving through the structure. There is no sense of people being present. There is a walk-way high up — with a wall or barrier about waist high. There is an opaque quality to the broad sides of the structure. It's very ~~and~~ "modern" in appearance — austere. It's BIG! There is a whirling sound and a sense of perpendicular, smooth movement, And like a belt of some sort (conveyor, etc.).
